

Guide for Healthcare Professionals

Prescribing the Miamind® Neurostimulator in 5 Steps

1.

Request the Documents

I am interested in treatment with Miamind and contact Bottneuro to receive the patient brochure and the data sharing consent form.

2.

Inform the Patient and Submit the Documents

I provide the patient with the brochure and send Bottneuro the signed data sharing consent form, including information on the indication and MRI status.

3.

Quotation and Prescription

Bottneuro contacts the patient and prepares a quotation. Once the patient has accepted the quotation, I prescribe the Miamind® Neurostimulator.

4.

Manufacturing and Start of Therapy

Bottneuro manufactures the Miamind® Neurostimulator as a custom-made device. The therapy start appointment takes place at my practice at a time convenient for the patient.

5.

Monthly Reports

I receive a monthly report from Bottneuro on the patient's use of Miamind.
